

Lamination Stacking

Lamination stacking machines available for E&I transformer laminations, sizes available from EI-28 to EI-209.

We also build special machines for:-

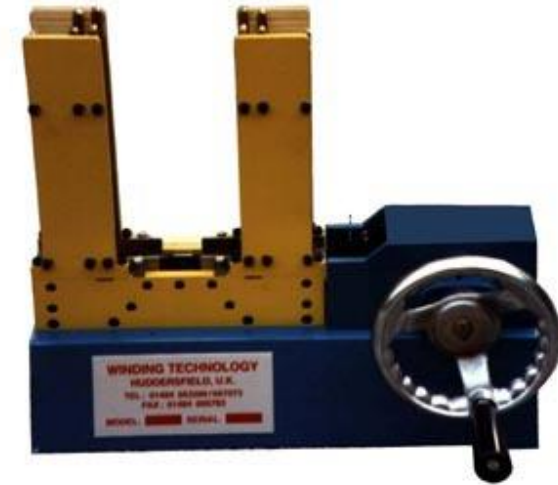

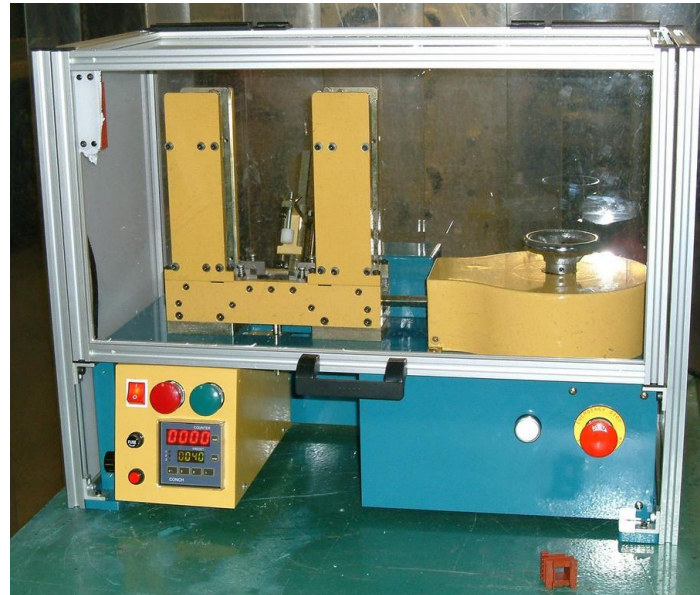

- Non-standard laminations (UI & EE laminations)
- Nickle type laminations
- Small laminations – machines to insert only the E lamination (Down to size EI 9)

Motorized versions are also available, fully guarded and compliant with current safety standards.

Our machines are fixed size, made to suit a specific size lamination. They are adjustable for different thicknesses of lamination steel.

If an order is placed for any of our lamination stackers we ask that you supply sample laminations and bobbins (including shrouds if used). This will enable us to set up the machine to work correctly.

If you require any further information, please do not hesitate to contact us.
