

## Machine Rebuilds

We understand the need to extend asset lives through refurbishing your existing or redundant coil winding machines.

We can rebuild your machines with one of our new control system for a fraction of the cost of a new machine.

When the rebuild work is complete, the machines are like new and fully compliant with current machine build standards. All rebuilt machines are supplied with a 12 month mechanical parts warranty and 3 year electrical parts warranty.

We have been rebuilding machines for the past 30 years and have a wealth of experience, rebuilding most well know machine brands.

Itasca 100

Samatic 2002

EMA GB28

Manufacturer	Model
